Search Notes

Dear Examiner Fadok:

Please find attached the results of your search for 10/068,550.

The search was conducted using the mandatory database lists for Business Methods.

These other sources were also used: Internet, STN

If you have any questions, please do not hesitate to contact me.

Thanks for using EIC3600!

Ginger

Title: A pricing system for air quality management

Author(s): Welsch, H. (Institute of Energy Economics, Univ. of Cologne
(Germany))

Source: Ecological Economics (Netherlands) v 5:1. Coden: ECECEM ISSN:
0921-8009

Publication Date: Mar 1992

p 15-49

Language: English

Abstract: A proposal is made on how the present state of environmental monitoring and modeling technology can be used for the design of a **feedback pricing** system for air quality management. This approach has the cost-effectiveness property of the classical standards-and-pricing and of the emission-trading approach but avoids the price indeterminateness of the former and the transaction complexity of the latter. The workability of such a system is examined by means of a simulation model that builds upon the stochastic characteristics of the real-world air quality data. 6 figs., 1 tab., 22 refs.

01210421 ORDER NO: AADNN-61103

DYNAMIC CONSISTENCY OF LEADER/FRINGE MODELS OF EXHAUSTIBLE RESOURCE MARKETS

Author: PELOT, RONALD PATRICK

Degree: PH.D.

Year: 1990

Corporate Source/Institution: UNIVERSITY OF WATERLOO (CANADA) (1141)

Source: VOLUME 52/11-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 4015. **329 PAGES**

ISBN: 0-315-61103-0

A dynamic **feedback pricing** model is developed for a leader/fringe supply market of exhaustible resources. The discrete game optimization model includes marginal costs which may be quadratic functions of cumulative production, a linear demand curve and variable length periods. The multiperiod formulation is based on the nesting of later periods' Kuhn-Tucker conditions into earlier periods' optimizations. This procedure leads to dynamically consistent solutions where the leader's strategy is credible, as he has no incentive to alter his original plan at some later stage.

A static leader-fringe model may yield multiple local optima. This can result in the leader forcing the fringe to produce at their capacity constraint, which would otherwise be non-binding if it is greater than the fringe's unconstrained optimal production rate. Conditions are developed under which the optimal solution occurs at a corner where constraints meet, of which limit pricing is a special case.

The two-period leader/fringe feedback model is compared in several respects to the computationally simpler open-loop model. Under certain conditions the open-loop model yields the same result as the feedback model, and is thus dynamically consistent. For example, if the price-taking fringe does not exhaust their resources, then the open-loop solution is identical to the feedback result.

A multiperiod feedback model of the world oil market with OPEC as price-leader and the remaining world oil suppliers comprising the fringe, is compared with the open-loop solution. The optimal profits and prices resulting from the two models are very similar, but large differences in production rates may occur. The exhaustion date predicted by the open-loop model may also differ from the feedback outcome. Some numerical tests result in non-contiguous production periods for a player or limit pricing phases.

Art Unit: 3625

1. A computer based method for determining a basis for accepting an order over a computerized network comprising:

seller (1)
a central controller establishing a first price for a product with a third party that is different from the central controller,

retailer (2)
the central controller accepting an offer for the product from a customer and arranging for the customer to redeem the product from the third party, (3)

receiving over the network, information relating to redemption of the product by the customer that has occurred;

utilizing the redemption information as a basis for accepting a subsequent customer offer for the product.

see B. Buck, head data

Garfinkel

(1) Price established by Central Controller

(2) Buyer makes an offer

STIC Search Results Feedback Form

EIC 3600

Questions about the scope or the results of the search? Contact *the EIC searcher* or contact:

Karen Lehman, EIC 3600 Team Leader
306-5783, PK5- Suite 804

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

Art Unit: 3625

1. A computer based method for determining a basis for accepting an order over a computerized network comprising:

seller ① a central controller establishing a first price for a product with a *retailer* ② third party that is different from the central controller,

~~the central controller accepting an offer for the product from a customer and~~ arranging for the customer to redeem the product from the third party, ③

receiving over the network, information relating to redemption of the product by the customer that has occurred;

utilizing the redemption information as a basis for accepting a subsequent customer offer for the product.

feedback, trend data

Harfinelle

① Price established by *Central Controller*

② buyer makes an offer

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:

Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.
